

Hydrogen Peroxide (30%)

Albone; carbamide peroxide; hydrogen dioxide;
hydroperoxide; Interlox; urea peroxide

DANGER! CORROSIVE! OXIDIZER!

Emergency Overview:

Colorless liquid with slight acrid odor. Corrosive, causes severe burns to eyes/skin/respiratory tract. Inhalation of high levels can cause central nervous system effects. It is a strong oxidizer capable of igniting combustible materials.

Precautionary Measures: Avoid exposure to skin. Wear protective clothing: Goggles, Face Shield, Gloves, Full Suit, Boots.

First Aid Procedures: Inhalation: Remove to fresh air and support breathing as needed. Eyes/skin: Remove contaminated clothing. Flush with plenty of water for at least 15 minutes. Ingestion: Do not induce vomiting. Consult physician immediately.

Fire Procedures: Noncombustible, but is a strong oxidizer capable of igniting combustible materials. Use flooding quantities of water. Do not use dry chemical extinguishers as they accelerate decomposition of this material.

Spill Procedures: Notify safety personnel, isolate and ventilate area. Keep combustibles away from spill. Take up with inert material such as earth or vermiculite. Cleanup personnel should protect against inhalation and eye/skin contact.

CAS No. 7722-84-1
